RATES FOR ORDERS

Payable in Canada and the United States

\$5 and under	-	-	-	-	3 Cents
Over 5 to \$10	-	-	-	-	6 "
" 10 to \$30	-	-	-	-	10 "
" 30 to \$50	-	-	-	-	15 "

Over \$50 use same rates.

HINTS TO PURCHASERS

As the seed season is only of a few months duration, we would impress upon you the advantage of sending in your orders early. By so doing you will greatly facilitate their execution, and also assure greater accuracy and attention.

Remember we send Free of Postage all Pkts., Ounces and $\frac{1}{4}$ lbs., but anything over that, the purchaser MUST send at the rate of 4 cents per lb., for postage, otherwise we will be compelled to deduct the amount from the seed ordered.

POUNDS.—When ordered at pound rates, FOUR CENTS per pound must be added for postage, otherwise it will be deducted from the amount, by reducing the quantity ordered.

BAGS.—To every order for one quarter bushel and upwards, to the amount of two bushels, 25 cents must be added for a new bag in which to ship.

HOW TO SEND MONEY.—All orders or communications shall be mailed to our address, Winnipeg, Manitoba. The money must always accompany the order, and can be sent at our risk by P. O. Money Order or registered letter. The cost of a registered letter to our address is only 5 cents; money order for \$5 or less, 3 cents, \$5 to \$10, 6 cents; \$10 to \$30, 10 cents; \$30 to \$50, 15 cents. It is unsafe to send currency in ordinary letters. If currency is sent by express, the charges should be prepaid, and if local cheques are used, 25 cents must be added to cover the cost of collection.

SIGN YOUR NAME.—It frequently occurs that we receive letters containing money and orders which we cannot fill, because the sender has failed to sign his name. Again, the P.O. address is frequently omitted, and the postmark being blurred, we are unable to fill the order, no matter how much we desire to do so. Use your order sheet and in all cases where you can, fill out the blank and sign your name and you will have no cause to censure us.

GUARANTEE.—Complaints made that seeds are not good, should twice as often be attributed to other causes as to the quality of the seeds. There are hundreds of contingencies continually arising to prevent the best seeds always giving satisfaction, such as sowing too deep, too shallow, in too wet or too dry soil, insects of every description destroying the plants as soon as or before they appear, wet weather, cold weather, frosts, chemical changes in the seed, induced by temperature, etc. For the above reasons it is impracticable to guarantee seeds under all circumstances, and while we exercise the greatest care to supply every article true to name, and of the very best quality, and believe our seeds to be the purest and the best to be found, we wish it to be distinctly understood that we sell no seeds with any warrant, express or implied, and we will not be in any way responsible for the crop.

CLUBS. We offer the following liberal inducements to Clubs, or those wishing to purchase seeds in packets. The seeds will be sent by mail, post-paid, but these low rates apply to seeds in packets only, and at Catalogue prices, but on anything over $\frac{1}{4}$ lb., no reduction whatever will be allowed from catalogue prices.

Send us \$1.00 and select packets to the value of \$1.30

SELECTED TURNIPS.

(Sow 2 to 4 lbs. per acre in drills.) Add four cents per pound for postage on Turnips. **Culture**—The soil best adapted to all Turnip crops is that of a loamy description, but may be grown upon heavy clay soils, if given thorough cultivation. Sandy and gravelly soils will yield but a light crop. The ground for Turnips should be manured and prepared in the fall. Many growers apply farmyard manure in the spring, just before sowing the seed, which is not a good plan; if a moist season no bad effects will result, but should the summer be dry, the crop is apt to be very rough and rooty, and not that clean, well shaped handsome crop which every grower expects. The seed may be sown in drills twenty inches apart or upon the level ground; the latter is best upon dry or well drained soils. Sow Swedes from June to the middle of July; and Aberdeen's Globe and Graystones from middle of July till end of August. Thin from 12 to 18 inches apart in the row and keep thoroughly cultivated.

SWEDES—Chester's Prize Purple Top

It is a large purple top, yellow variety, beautiful shape, with single tap-root, free from coarseness of neck, and for uniformity of crop and keeping qualities is superior to all other swedes. It produces a very heavy weight per acre and keeps sound and good until late in the spring; flesh always sweet and rich. Per $\frac{1}{4}$ lb. 10c., 1b. 25c., or over at 20c

Bangholm Purple Top—A Scotch variety good for clay soils. Per lb. 15c. 5 lbs. or over at 20c.

PERENNIALS.

To give our customers an idea how and where to plant we give height when in flower. This is indicated by feet or inches, when they flower by the month; the figures 5 and 6 means the plant will bloom from May to June; 8 and 9, from August to September unless otherwise mentioned, for some bloom all summer. We also give the common name by which some are best known.

WIND FLOWER—The late-flowering varieties are among the most desirable of the hardy plants. The early flowering kinds are just as nice.

A Whirlwind—A semi-double form of, and in general style and habit identical with, the white Anemone, but more free flowering. 25 cents each.

A Honore Joubé—Pure white, form of greatest beauty; choice for cutting purposes. 25 cents each.

A Ranunculoides—Yellow Wood—6 in. 3, 6—Charming clear yellow flowers. The plant soon spreads into a broad clump, and when in flower in the Spring presents one of the most beautiful effects possible. 25 cents each.

COLUMBINE—A. Vulgaris—Mixed fine colors. 25 cents each.

BERGAMOT—2 ft., 7, 8—Dense heads of deep lilac flowers. Rich aromatic foliage and flowers. 25 cents each.

CARNATIONS—HARDY—Fine seedlings; cannot guarantee all double, but the single ones are all marked and scented. They have been out all winter, 20 cents each, \$2.00 per dozen.
